

International Joint Commission

Dear Sirs,

I was most distressed to read you will investigate raising the levels of Lake Michigan 20 inches. We have fought this level raising for years, and recently experienced a very nice beach, due to lower water level.

If you raise it even two inches, my property and neighbors will suffer terrible erosion. We experienced this years ago, and do not wish to allow it again. Seawalls are very expensive, and it really is impossible to fight Mother Nature.

You know all the reasons us property owners are vitally against your raising the level..

This is just a firm protest against raising the levels at all.

Sincerely,
Ann G Bennett

P.S. I am 88 years old, retired swimmer in cold water, and walk the beach every day, leave the level alone!
