Dear IJC

I wanted to express my family's deep concern regarding proposed changes allowing a significant increase in Great Lakes levels.

We live on the shore of Lake Michigan north of South Haven MI. on what is normally a very stable area of bluff/shoreline. In earlier years (esp. '85-'86) we experienced nearly catastrophic erosion along our bluff, threatening our home and property due to high Lake levels. We spent very large, burdensome amounts of money repairing all the damage caused and we would be severely negatively impacted if anything near those lake levels were allowed to recur.

Please do NOT allow an increase to Great Lakes levels beyond the current conventions.

Thanks so much for your diligent work,

John & Dorothy Meulendyk & family
